K.-E. Hansen or C.H. Ørssleff, the Group Executive Board

Revenue for Q1 2006

Revenue for the month of March 2006 has exceeded expectations and amounts to € 94m compared to € 70m for the month of March 2005 corresponding to an organic growth of 35%. For Q1 2006 the revenue amounts to € 255m compared to € 211m for Q1 2005 corresponding to an organic growth of 21%. We draw your attention to the fact that Easter in 2005 fell in the month of March, and Solar makes no adjustment of working days at the calculation of organic growth. Non-working days in connection with Easter vary between 1 and 3 days in the countries where Solar is operating.

Expectations for revenue were expressed in the Annual Report for 2005 with the incorporation of a growth of 6% for the year 2006 to € 965m. The revenue of 2006 will exceed the expressed expectations owing to a higher activity during the passed part of the year and expected higher activity for the rest of the year than previously estimated.

A merger with Solar Holding A/S is expected to be adopted at the annual general meetings of the companies on 21 April this year. The management of the merged company will subsequently 15 May 2006 publish earnings for Q1 2006 and expectations for the year 2006.

Yours faithfully
